

# Risk Management

- Define the strategy criteria
- Determine the possible alternative strategies
- Identify the risks and benefits of each alternative
- Make a comparative evaluation of these alternatives
- Make the strategic decision
- Document the selected strategy

# Possible Risks

- One or more functions you do not know how to design.
- Support system problems that delay your work.
- Product is defective resulting in long testing time.
- Lose control of the product or product changes and waste time reconstructing programs already developed.
- Team does not work together effectively.
