Discuss the CURSE

- Complexity
  - How intricate is it? How involving is it?

- Uncertainty
  - Are there any parts of the task the team is unsure of? (e.g. technology needed, unsure of consequences of the story)

- Risk
  - What are the dangers of this story? (Regression?)

- Scope
  - How far reaching is the work?

- Effort
  - How much work is needed? (Generally, what determines story points)

Ian Tyler Applebaum · Adjunct Instructor · Temple University CIS

How do we point?

- Assign each story and bug a story points

- Points will be interpreted differently according to teams

- Many different systems for pointing but any is good as long as the team agrees on it

- Story points are NOT days or hours

- Estimated by all engineers

- Generally, Scrum masters do not participate*
